Biochemical Genetics—Volume 21, 1983

A journal for the reporting of original research in biochemical genetics of any organism, from virus to man. Papers will deal with the molecular aspects of genetic variation and evolution, mutation, gene action and regulation, immunogenetics, somatic cell genetics, and nucleic acid function in heredity and development and with the biochemical aspects of genetic defects (provided these are not purely clinical).

Papers on new methods that apply to the above topics will be included.

Review articles will also be published occasionally.

EDITOR

Hugh S. Forrest, Department of Zoology, University of Texas at Austin, Austin, Texas

EUROPEAN EDITOR

Forbes Robertson, Department of Genetics, University of Aberdeen, Aberdeen, Scotland

ASSOCIATE EDITORS

C. S. Lee, University of Texas at Austin, Austin, Texas
Charles R. Shaw, University of Texas M. D. Anderson Hospital, Houston, Texas
Richard E. Tashian, University of Michigan, Ann Arbor, Michigan
Allan C. Wilson, University of California, Berkeley, California
